FORTRESS LAUNCHES NEW WEBSITE AND PRODUCT LITERATURE

(Toronto) Fortress Technology is pleased to introduce its completely revamped website www.fortresstechnology.com. Designed with a fresh look and intuitive navigation, the new site gives customers quick access to the information that they need. Within a couple clicks, visitors can find details on the metal detection system that meets their requirements, download the informative product brochure, and gain a better understanding of the system's application in their plant. The complete range of *Phantom* metal detectors for a wide variety of industrial applications is presented, along with the unique options of the *Vector* Conveyor system and *CONTACT* Communication Software.

Now featured on the website is the latest news from Fortress including press releases and published articles from industry publications. Hot news items are highlighted on the dynamic homepage. Furthermore, customers who are novices to the world of metal detection can benefit from tutorials explaining how the technology works and what the important considerations are.

Launching concurrently with the website are new two-page product brochures. The stylishly redesigned printable product literature uses a clean professional layout to clearly organize and communicate the product features, available options and specifications.

For more info, please visit the new www.fortresstechnology.com

simple operation
outstanding reliability
exceptional performance

www.fortresstechnology.com
